Profile

An engineer by training — textile engineering, then a master's in mathematical engineering — I have been building websites and web applications since 2019, after developing software for industry from 2011: assembly-line balancing, defect traceability, an information system and an Android app. My most recent project, RusStudy, is a four-language platform (including right-to-left Arabic) with a role-based application-tracking portal, built with React, Node.js and Supabase and deployed on Vercel. I take the time to understand the business before writing the code.

TEXTILE ENGINEERING · BUSINESS CONSULTING · DIGITAL TRANSFORMATION · INNOVATION & R&D

What I bring to this role

01 Web platform
RusStudy: React, Node.js, Supabase, deployed on Vercel; application-tracking portal with admin, consultant and student roles.

02 Multilingual front end
Four-language sites with right-to-left layout and technical SEO; business websites in HTML, CSS and JavaScript (Yulia Gorbel, PermaGroup).

03 Business software
Information system for QUEEN (freelance, 2013), Android sales-tracking app, traceability and line-balancing software.

04 Algorithms & data
C++, OpenCV, Matlab, Python: computer vision, 3D reconstruction, modelling; master's in mathematical engineering.
